

Malav Mistry

Raleigh, NC | +1 (562) 377-4972 | malav345@gmail.com

A professional with 8+ years of hands-on experience in the software industry, primed to leverage expertise in tackling intricate problems while driving innovation and delivering tangible results.

Technical Skills

Backend Development: C#, .NET, .NET Core, ASP.NET, REST, PHP, Python, MVC

Database: SQL, T-SQL, MySQL, MS SQL, SSMS (SQL Server Management Studio), SQLite

Web Development: Angular, AJAX, Bootstrap, JSON, HTML, CSS, XML, JavaScript, jQuery, Blazor

Desktop Development: WPF (Windows Presentation Foundation), .NET MAUI (Multi-platform App UI)

Tools: Visual Studio, Postman, PowerShell, JMeter, FileZilla

Version Control: Git, GitHub, GitLab, BitBucket

Cloud Platforms: AWS (Amazon Web Services), Microsoft Azure, Jenkins, TeamCity

Experience

Software Developer 3

Sept 2022 – Present

FDH Infrastructure Services (Raleigh, NC)

- Develop and maintain web application using Angular, ASP.Net, C#
- Developed web API using .Net Core, C#, .net MVC
- Design database schema using MS SQL and SQL Queries
- Utilized Entity Framework 6 for database connectivity, schema management, and CRUD operations
- Develop and maintain Desktop applications using Microsoft WPF and .Net MAUI using MVVM
- Created Test project and implemented unit and integration testing using NUnit
- Enforce Test driven development in an Agile, SCRUM, environment.
- Used Bitbucket for version controlling and Azure for Cloud Infrastructure, CI/CD
- Involved in SDLC and work with PMs, in requirements gathering, prioritization and estimation exercises.
- Provide technical assistance to team members and junior developers, fostering collaboration
- Developed FAST API using python, to integrate and consume models created by Data Science team, and expose these APIs Internally. Created a Docker Slim version and hosted on Azure ACI
- Technology: C#, .Net Framework 4.8, .Net Core, MVC, MVVM, Angular, SQL, T-SQL, REST API, MS SQL, WPF, .Net MAUI, CI/CD, Bitbucket, Azure, Microservices, ASP.NET, JSON, SQLite, Python, Docker

Software Developer

Nov 2021 - Sept 2022

Credit Suisse (Raleigh, NC)

- Worked on core functionalities in Risk Management System (RMS) used by traders
- Developed and maintained Web API to run feeds using C#, .Net MVC
- Developed and maintain desktop application using .net WPF and MVVM architecture.
- Collaborated with PMs to analyze and implement advanced predictive solutions tailored to business needs.
- Designed and implemented database schemas and analyze and optimize SQL query and Stored Procedures
- Created robust unit and integration test cases maintaining test driven development.
- Worked closely with junior developers to resolve technical roadblocks, foster skill enhancement, and ensure project progress through effective collaboration and mentorship.
- Technologies: C# .Net Framework 4.5, .Net Core 3.1, .net MVC, SQL, T-SQL, REST API, MS SQL, WPF, MVVM, CI/CD, MicroServices, GIT, Teamcity, Agile, Scrum

Software Developer

July 2017 - Nov2021

Motionsoft Inc. (Rockville, MD)

- Developed web application for Membership Management using C# and ASP.NET
- Developed client-side scripting using HTML, CSS, JavaScript, jQuery, AJAX.
- Created Restful web APIs using .net Core MVC and support multi-tier web applications

<https://www.linkedin.com/in/malav-mistry-b8b72975>

<https://malavmistry.github.io/MalavMistry>

- Designed and implemented database schemas using MS SQL
- Optimized views, queries and Stored Procedures SQL, T-SQL
- Provide Production support on rotation basis, by debugging and fixing issues in the application code
- Create complex SQL scripts to identify and clean data specific issues to run on Production sites
- Managed and maintained AWS database for internal troubleshooting of software issues.
- Leveraged AWS for cloud infrastructure, CI/CD, SNS, SQS EC2 instances and Github for version control
- Interfaced application with peripheral hardware such as receipt printers, sig pads, payment devices, RFID Scanners
- Technologies: C#, ASP.Net, .Net Core 2, MVC, REST APIs, MS SQL, SQL, T-SQL, Angular 12, MicroServices, Github, AWS. Jenkins, HTML, CSS, Javascript, JSON, AJAX, Razor, Service Oriented Architecture, XML, AJAX, XHR, Agile, Scrum

Web Developer

Feb 2017 - April 2017

Pronear Inc (Los Angeles, CA)

- Developed and maintained a responsive landing website using HTML5 CSS3, JavaScript, jQuery
- Used php to validate and store user data in .csv format.
- Set up tracking to track user events on website.
- Technologies: HTML5, CSS3, JavaScript, JQuery, PHP, Mixpanel

Software Engineer Intern

July 2014 - July 2015

Persistent Computer Services (Mumbai, India)

- Collaborated with senior developers to deepen understanding of SDLC fundamentals.
- Worked alongside project managers and development teams to deliver high-quality products.
- Applied object-oriented principles in developing multi-threaded applications.
- Contributed to a team that created and maintained web applications for desktop environments.
- Optimized and tuned poorly performing scripts for better efficiency.
- Troubleshoot and debugged software issues effectively.
- Technologies: .NET, ASP.NET, C#, Visual Studio, HTML, CSS, JavaScript, JQuery, SQL.

Education

- Master of Science in Information Systems Security
University of the Cumberlands January 2020- July 2022
- Master of Science in Computer Science
California State University, Long Beach August 2015- Dec 2016
- Bachelor of Engineering in Information Technology
University of Mumbai August 2011- May 2015

Certification

Microsoft Certified: Azure Fundamentals

Credential ID: B0E3E910FF6DA24A, April 2024

Applied Machine Learning in Python, University of Michigan,

Credential ID: FPTRBF9P37ES, Aug 2024
